

UX/UI Product Re-Audit

Current product · current code · current deployment · current browser · current findings.

DATE/STATUS	2026-09-14 · PASS
HEAD/BRANCH	65e655e0c4 · development
SKILL	1.5.0 / 1.5.0 candidate (runtime implementation header); manifest/skill.yaml metadata 1.4.0 runtime
SURFACE	APPLICATION + LANDING_PAGE
CANONICAL	https://impulso.ancora.com
ENVIRONMENT	PRODUCTION
EVIDENCE	83
HISTORICAL	13

Audit consistency remediation

Targeted revision: prior evidence is preserved; UX-08 is retested and coverage semantics are normalized.

Item	Correct value
FIRST_ONBOARDING	COVERED_READONLY
COMPLETE_PROFILE	BLOCKED_WRITE
LOGOUT	COVERED
SESSION_RECOVERY	COVERED
COMPLETE_WORKOUT	BLOCKED_WRITE
RESUME_WORKOUT	PARTIAL
EXERCISE_DETAIL	COVERED_READONLY
MEAL_PLAN	COVERED_READONLY
ACHIEVEMENTS	COVERED_READONLY
UX-08	Refined split-entry finding
SKILL_VERSION	SKILL.md authoritative; drift documented
RUNTIME_VERSION	1.5.0 candidate; 1.4.0 metadata

UX-08 retest

CONFIRMED: root is login, /landing is public, CTAs work and manifest start_url is /auth/login. The finding is refined to a split-entry model.

Progress selective analysis

Dimension	Observation
PRIMARY_USER_GOAL	Understand meaningful change and choose the next training action.
PRIMARY_ACTION	Review recommendation and switch charts/measurements/records.
KPI_INTERPRETABILITY	Good state scan; zeros and missing values need period/baseline context.
LOW_DATA_STATE	Honest, with missing trend and recommendation cues; no fabricated progress.
TREND_CLARITY	Charts are discoverable, but interpretation is weaker than metric inventory.
NEXT_ACTION	Return to workout or act on recommendation; currently implied rather than orchestrated.
MOBILE_DESKTOP	Readable stacked mobile cards; denser but scannable desktop KPI/chart area.
LIGHT_DARK_ES_EN	Both themes and ES/EN represented; document lang remains Spanish.
WHAT_WORKS_WELL	Honest low-data state, visible recommendation, separate chart/measurement/record views.

Dimension	Observation
FRICTION	The user can see state but not always what changed or what to do next.
DO_NOT_BREAK	Preserve honest missing-data treatment and avoid decorative or invented progress.
ANSWER	Partially answers what changed and what to do next.

Nutrition selective analysis

Dimension	Observation
PRIMARY_USER_GOAL	Understand today's nutrition state and choose log, plan or generation action.
CALORIE_MACRO_CLARITY	Daily state and macro concepts are visible; action meaning could be clearer.
PLAN_LOGGING	Plan access/generation and logging are discoverable; post-write feedback not tested.
RECOMMENDATION_RATIONALE	Recommendations are visible, but selection rationale is not established.
EMPTY_LOW_DATA	Current low-data state is readable; fully empty first-day state not induced.
WORKOUT_RELATIONSHIP	Conceptually adjacent, not presented as coordinated next action.
NEXT_ACTION	User chooses among parallel log/generate/review controls.
MOBILE_DESKTOP	Readable vertical mobile stack; clearer desktop workspace than workout ledger.
LIGHT_DARK_ES_EN	Both themes and representative private locales covered.
WHAT_WORKS_WELL	Daily state, macro/recommendation framing and visible plan/log affordances.
FRICTION	No single highest-value nutrition action dominates.
DO_NOT_BREAK	Keep visible daily state and user-controlled non-clinical actions.
ANSWER	Helps choose a nutrition action, but currently behaves as a parallel dashboard.

Gamification selective analysis

Dimension	Observation
LEVEL_XP_STREAK	Level, XP and streak are visible status signals.
ACHIEVEMENTS	Achievement and history provide a real review destination.
PROGRESS_MEANING	Status is clearer than meaning; next unlock/behavior is less explicit.
REWARD_FEEDBACK	Display is observed; feedback after earning was not tested.
MOTIVATION_PRESSURE	Reinforcement potential is plausible; behavior change and pressure need longitudinal evidence.
NEXT_ACTION	Review achievements or return to training; bridge is implicit.
WORKOUT_PROGRESS_RELATION	Separate from workout completion and Progress workspace in the observed UI.
MOBILE_DESKTOP_LIGHT_DARK_ES_EN	Readable stacked mobile and compact desktop views in both theme/locale families.
WHAT_WORKS_WELL	Concrete level/XP/streak/achievement/history vocabulary.
FRICTION	Surface shows progress without making the next rewarding behavior unmistakable.
DO_NOT_BREAK	Keep rewards subordinate to meaningful training behavior.

Dimension	Observation
ANSWER	More than decoration, but not yet proven behavior guidance.

01 Executive assessment

Verdict

Better access and materially deeper private-product evidence than the previous artifact. Status is **PASS** for this consistency remediation; inherited deep-audit limitations remain documented because safe boundaries prevent writes and fixture-sensitive tests.

BROWSER RECORDS

83

SCREENSHOTS

57

JOURNEYS

21

PRIVATE SURFACES

10

Question	Answer
BIGGEST FRICTION	Long repeated workout set ledger without persistent focus
BIGGEST QUICK WIN	Per-set accessible names/fieldsets
BIGGEST STRUCTURAL	Focused mobile workout workspace
BIGGEST AI TRUST	Inputs/rationale/regenerate/undo
OVERALL	Good foundation; fair-to-good active fitness UX

02 What changed

The prior seven screenshots and private preview record are preserved with context. Current production adds 55 useful screenshots, explicit viewports, language/theme variants and route-specific evidence. No product source changed.

03 Methodology and depth gap

Contractual skill v1.5.0 wins over v1.4.0 manifest/runtime metadata. Browser evidence is PRODUCTION. `COMPLETED != COVERED` and blocked writes are not scored as failures.

Field	Value
talent_browser_evidence	90
impulso_browser_evidence	74
talent_full_journey_records	HIGH
impulso_full_journey_records	21
talent_screenshot_integration	HIGH
impulso_screenshot_integration	HIGH; every current screenshot indexed and chapter-linked
talent_private_surface_depth	HIGH
impulso_private_surface_depth	HIGH read-only / explicit writes gap
talent_viewport_depth	Broad
impulso_viewport_depth	7 viewports, private core at 1440/390/430
talent_i18n_depth	Private journey coverage
impulso_i18n_depth	Private ES/EN captures plus document-lang finding
talent_accessibility_depth	Dedicated tool pass
impulso_accessibility_depth	AX + code; private composed audit tool gap

04 Surface and product model

Field	Result	Source
Primary	APPLICATION	Private route evidence
Secondary	LANDING_PAGE	/landing

07 Screen and experience maps

Screen	Purpose	Primary	Entry	Exit	Recovery
/	Returning auth entry	Login	Direct	/dashboard	Use /landing for acquisition
/landing	Public acquisition	Start journey	Public CTA	/auth/signup	Cookie preferences
/dashboard	Next action hub	Start/resume	Auth	Workout/routes	Refresh/session
/workouts/generate	Plan setup	Generate AI workout	Dashboard	/workouts/:id	Keep inputs
/workouts/:id	Plan review	Start	Generator	/start	Back
/workouts/:id/start	Live session	Mark/finish	Plan review	/progress	Keep draft
/exercises	Discovery	Search/filter	Shell	Detail	Clear search
exercise detail	Technique	Read instructions	Library	Library	Close
/progress	Interpretation	Review next action	Shell	Workout	Low-data
/nutrition	Daily intake	Log/generate	Shell	Meal plan	Empty state
/achievements	Motivation	Review progress	Shell	Dashboard	No-data
profile dialog	Preferences	Save profile	Account	Dashboard	Close
admin/content	Editorial admin	Restricted edit	Account	Library	Safety blocked

Stage	Entry	Goal	Action	Friction	Result
Acquisition	/landing	Understand value	Read hero/proof	Signup	Choose entry
Login	/auth/login	Reach workspace	Submit credentials	Dashboard	Retry
Onboarding	/dashboard	Supply context	Choose goal/data	Personalization	Later/back
Generate	/workouts/generate	Create plan	Set constraints/AI CTA	Pending	Keep inputs
Execute	/workouts/:id/start	Complete sets	Enter/mark/rest	Partial session	Keep draft
Progress	/progress	Know what changed	Read KPI/recommendation	Next action	Return workout
Nutrition	/nutrition	Act on intake	Read/log/generate	Nutrition state	Dashboard
Return	/dashboard	Resume momentum	Use action hub	Start/resume	Discard/continue

08 Workout generation and execution

Generation exposes profile proposal, 40+ rationale, controls and AI CTA; safe write boundary prevents result/regenerate/undo observation. Review exposes start and delete. Execution exposes four exercises, 12 sets, reps/load/RIR/RPE/rest, mark/rest, progress, notes and exit/finish. At 390×844 only the first exercise is above fold; later sets require scroll.

Measure	Observed	Implication
Sets	12	Repeated scan
Scroll	Later groups below fold	High divided attention
Timer	Rest card visible; live timer not activated	Later visibility unknown
Next action	Mark local to row	No persistent focus
Completion	Not invoked	Blocked write

09 Mobile ergonomics

Touch controls are visible and the shell is responsive, but the hamburger/drawer creates a context switch and the workout page is a long form. The evidence supports `PARTLY\_SUPPORTED`, not a real-workout certification.

Dimension	Rating	Basis
Thumb reach	FAIR	Frequent controls local; global nav outside bottom reach
Target size	GOOD	Visible targets touch-sized
Scroll during set	POOR	Later sets below short viewport
Timer visibility	GOOD	Rest card visible; live later state unknown
Current exercise visibility	FAIR	First prominent; later focus requires scroll
Next action clarity	FAIR	Mark/Rest clear; next implicit

10 Progress, nutrition and gamification

Progress provides KPIs, adherence, recommendation, charts and low-data interpretation. Nutrition provides daily state and plan/log actions. Gamification provides level/XP/achievement/history. All are real renderable surfaces; longitudinal utility and cross-surface loop remain open.

Workspace	Primary	Density	Mobile	Desktop
Dashboard	Start/resume	Medium/high	Readable/tall	Strong hub
Workout	Mark/finish	High	Long scroll	Dense
Progress	Review action	Medium	Stacked	Clear KPIs
Nutrition	Log/generate	Medium	Vertical	Readable
Exercises	Search/filter	High	Filters consume fold	Virtualized
Achievements	Review	Medium	Stacked	Compact

11 Shell, viewport, theme, i18n and access

Viewport	Private representation	Observation
1920×1080	Workout	Wide but repetitive
1440×900	Core routes	Desktop baseline
1366×768	Dashboard	Short chrome tradeoff
1024×768	Generator	Tablet
768×1024	Exercises	Portrait density
430×932	Private routes	Mobile
390×844	Private routes	Core workout

Private light/dark and ES/EN captures are present. Visible English copy changes but document language remains Spanish. AX exposes named controls, while repeated workout inputs lack specific names. Private composed accessibility tool is a compatibility gap.

12 Historical matrix and scorecards

ID	Status	Current evidence	Change
F-01	VERIFIED_FIXED	B01-B03: preflight 204, health 200, login/dashboard pass	FIXED
F-02	NOT_RETESTED	No induced backend fault after remediation; successful path passes B03	NOT_RETESTED
F-04	STILL_PRESENT	E61-E62/B08-B14: root remains login; /landing and both CTAs are real; manifest start_url is /auth/login	REFINED

ID	Status	Current evidence	Change
F-05	STILL_PRESENT	E05/E06: providers on login, credential-only signup	NO_CHANGE
F-06	STILL_PRESENT	E05-E07 current 390x844 captures	NO_CHANGE
F-07	STILL_PRESENT	E01-E04 current landing captures	NO_CHANGE
F-09	STILL_PRESENT	E29-E48 show hamburger shell/no persistent bottom nav on private mobile	RETESTED
H-08	NOT_RETESTED	Admin not authorized or entered	NOT_RETESTED
H-09	PARTIALLY_FIXED	E12 plus current authenticated onboarding dialog: three steps, progress, fields and later/continue intent observed; completion not submitted	PARTIAL_OBSERVATION
H-10	PARTIALLY_FIXED	E14/E56 show proposal, rationale, controls and AI CTA; no result/regenerate/undo	PARTIAL_OBSERVATION
H-11	PARTIALLY_FIXED	E26-E28/E35/E42/E48/E52/E60 show real 12-set session; completion not run	PARTIAL_OBSERVATION
H-12	PARTIALLY_FIXED	E16/E22/E32/E39/E46/E58 show KPIs/recommendation/chart/low-data state	PARTIAL_OBSERVATION
H-13	PARTIALLY_FIXED	E17/E23/E33/E40/E47/E59 and E18/E24/E34/E41 render both workspaces	PARTIAL_OBSERVATION

Application

Dimension	Rating	Basis
Clarity	GOOD	Shell labels and workspace headings clear; low-data/AI need more context
Efficiency	FAIR	Repeated workout fields and mobile drawer add steps
Consistency	GOOD	Shared shell/theme/locale patterns
Feedback	FAIR	Success/low-data visible; induced fault not tested
Error recovery	FAIR	Exit/keep draft explicit; failure fixture absent
Cognitive load	FAIR	Workout ledger is highest load
Navigation	FAIR	Desktop clear; mobile drawer context switch
Accessibility	FAIR	Repeated set inputs need names
Responsive task completion	FAIR	Private mobile renders; live completion not run
Viewport economy	FAIR	Mobile auth/workout vertical burden
Primary workspace	FAIR	Dashboard strong; workout needs focus
Workflow efficiency	FAIR	Read-only path discoverable; writes bounded
Progress interpretation	FAIR	State is honest; period meaning and next action less explicit in low-data state
Nutrition decision support	FAIR	Daily state/actions visible; UI remains parallel rather than orchestrated
Motivation meaning	FAIR	Level/XP/streak/achievements real; behavior change not longitudinally proven

Landing / AI / Premium

Dimension	Rating	Basis
Audience/purpose	FAIR	Root/landing split
Value proposition	GOOD	Fitness promise clear
Visual hierarchy	GOOD	Hero leads; accents compete
Conversion	FAIR	CTA available; entry ambiguity
Responsive	GOOD	No material public overflow
Accessibility	FAIR	Named controls; landmarks/semantics gaps
Trust	GOOD	Legal/cookie/auth links visible
AI disclosure	GOOD	AI CTA explicit
Explainability	FAIR	40+ rationale broad
Reversibility	NOT_EVALUATED	No result/undo invoked
Control	GOOD	Many constraints
Expectation setting	FAIR	Wait/error/result not observed
Trust	FAIR	Good start, incomplete contract
Hierarchy	GOOD	Strong dark shell/CTA
Brand coherence	FAIR	Copper base; landing accents fragment
Typography	GOOD	Modern readable type
State clarity	FAIR	Partial/low-data visible
Density	FAIR	Exercise/workout dense
Memorability	FAIR	Fitness signal, dashboard patterns
Mobile polish	FAIR	Workout/nav need refinement

13 Findings, strengths and roadmap

UX-01

HIGH · P1

Workout execution is a long-form set ledger rather than a focused training workspace

E26/E35/E42/E48/E52/E60 show 12 set rows and four exercise groups in one continuous page; at 390×844 only the first exercise is above the fold.

Scope

PRODUCT_UX

Journey

J10

Impact

Repeated scan/scroll and loss of next-action focus during a physical session.

Change

Add current-exercise focus, sticky progress/rest, explicit next/previous and compact set navigation.

UX-02

MEDIUM · P2

Mobile shell hides navigation behind a hamburger during an active fitness workflow

E29-E48 show top hamburger and no persistent bottom nav; frequent navigation requires opening a drawer.

Scope PRODUCT_UX

Journey J20/J24

Impact Extra taps and interruption risk for one-handed users.

Change Keep drawer for low-frequency destinations but add explicit in-workout reachable navigation and safe exit semantics.

UX-03

HIGH · P1

Repeated workout inputs lack sufficiently specific accessible names

E26/E35/E42 AX snapshots expose many unnamed textboxes beside named 0-5/0-10 fields; source relies on visual grouping.

Scope PRODUCT_ACCESS

Journey J10

Impact Keyboard/screen-reader users cannot reliably distinguish repeated fields.

Change Use unique names, fieldsets and timer/rest live-region semantics for each exercise/set/metric.

UX-04

MEDIUM · P2

Exercise discovery spends image space on unavailable media placeholders

E15/E31/E38/E45/E51/E53/E57 show repeated 'Imagen no disponible todavía' cards and mixed exercise naming.

Scope PRODUCT_UX

Journey J13

Impact More scanning and weaker confidence before opening detail.

Change Use a compact category/icon placeholder and prioritize name, target muscle and level.

UX-05

MEDIUM · P2

AI proposal explains profile rules but not controllable result rationale or reversibility

E14/E20/E30/E37/E44/E56 show proposal, 40+ rationale, controls and AI CTA; no result/regenerate/undo was safely invoked.

Scope PRODUCT_UX

Journey J07

Impact Uncertainty about what the plan uses and how to recover from an unwanted result.

Change Show inputs used, post-generation rationale, edit/regenerate and discard/undo.

UX-06

MEDIUM · P2

Progress low-data KPIs can read as failure despite a useful recommendation

E16/E22/E32/E39/E46/E58 show 0 weekly adherence, 0 kg volume, missing trend and a consistency recommendation.

Scope PRODUCT_UX

Journey J15

Impact Early users may see absence as failure rather than a next step.

Change Pair low-data values with period, confidence and one above-fold next action.

UX-07

MEDIUM · P2

Nutrition and gamification do not yet expose a shared next-action loop

E17/E18/E23/E24/E33/E34/E40/E41/E47/E59 plus the selective surface review.

Scope PRODUCT_UX

Journey J16/J18

Impact Metrics can feel decorative and require extra navigation to act.

Change Define one evidence-based cross-surface next action only where it helps the user, such as a workout completion cue leading to nutrition logging or XP feedback.

UX-08

MEDIUM · P2

Public entry model splits login root from marketing landing

E61-E62/B08-B14 plus app/page.tsx and site.webmanifest: / renders login for anonymous and authenticated sessions; /landing is reachable with working signup/login CTAs; start_url remains /auth/login.

Scope PRODUCT_UX

Journey J01

Impact Entry intent is ambiguous rather than the landing being absent; users can reach signup/login once they know the route.

Change Choose and document the canonical model and align root, authenticated redirect, CTA semantics and PWA start_url.

UX-09

MEDIUM · P2

Login offers more social entry choices than signup

E05/E06 show Google/GitHub on login and credential-only signup.

Scope PRODUCT_UX

Journey J02/J03

Impact Extra navigation and uncertainty about provider account creation.

Change Align provider actions or explain the single account-creation path.

UX-10

MEDIUM · P3

Mobile auth card reserves more vertical space than the short form needs

E05-E07 at 390×844 show centered cards with notable unused top/bottom space.

Scope PRODUCT_UX

Journey J02/J04

Impact Lower focus and less efficient thumb-zone use for a high-intent task.

Change Reduce mobile card chrome and align the form to a deliberate safe-area position.

Landing proof palette dilutes the copper fitness identity

E01-E04 show cyan, green and purple feature accents beside copper/orange brand elements.

- ScopePRODUCT_UX
- JourneyJ01
- ImpactLower memorability and weaker premium confidence.
- ChangeKeep semantic status colors but make copper the primary emphasis token.

What works well

Capability	Evidence	Why	Do not break
Canonical auth/session	B01-B05	Login, API, refresh and logout pass after CORS runtime fix	Preserve explicit origin/session handling
Action hub	E13/E19/E29/E36/E55	Dashboard prioritizes next best action	Keep primary action above fold
Workout controls	E26-E28/E35/E42/E48/E52/E60	Targets, rest, notes, progress and exit/finish are real	Preserve draft and recovery
Exercise discovery	E15/E31/E38/E53/E54	Search/filter/detail support discovery at scale	Preserve filter/detail model
Progress transparency	E16/E22/E32/E58	Missing data is not fabricated; recommendation is visible	Keep honest low-data copy
Theme/locale	E19/E36/E55/B07	Private visible copy/theme switch	Preserve persistence and contrast
Fitness identity	E01-E04/E55/E60	Copper mark and dark navy shell are distinctive	Keep restrained copper anchor

Roadmap

Phase	Work	Source		
S1	Focused mobile workout workspace	P3	UX-01/02/03	Current long form needs focus, next action and safe reachability
S2	Unified public entry model	P1	UX-08	Align root/landing/manifest intent
S3	AI rationale and reversibility	P4	UX-05	Make inputs/results inspectable
S4	Fitness weekly loop	P5	UX-07	Connect progress/nutrition/XP
S5	Safe first-use fixture	P4	H-09	Measure onboarding without profile mutation
Q1	Unique per-set names/fieldsets	P0/P1	UX-03	LOW
Q2	Align login/signup provider actions	P1	UX-09	LOW
Q3	Add period/confidence to low-data KPIs	P2	UX-06	LOW

Phase	Work	Source		
Q4	Reduce mobile auth card dead space	P3	UX-10	LOW
Q5	Compact unavailable-image placeholder	P5	UX-04	LOW
Q6	Synchronize document lang	P2	B07/code	LOW

14 Evidence, limitations and final answer

Metric	Result	Gate
Browser records	83	>=60
Useful screenshots	57	>=40
Full journeys	21	>=15
Mobile private	7	>=4
Desktop private	10	>=6
Themes/locales	light+dark / es+en	PASS

- No workout completion, profile save, meal log, AI generation, delete or admin write.
- No OAuth provider launch, first-use incomplete-profile fixture, controlled backend fault or offline/PWA install.
- Longitudinal progress/motivation value cannot be established from the test account history.
- Private automated accessibility composition did not return a material authenticated element report; this is a tool-compatibility gap.
- No credentials, tokens, emails or private personal data are included in the report.

Question	Answer
Comparative	Better on access/private evidence; writes remain bounded
Canonical	Operational for login, API, dashboard, refresh and logout
Mobile workout	Partly supported, not certified
AI	Moderate foundation; reversibility incomplete
Progress/nutrition	Useful current states; longitudinal loop open
Premium	Strong base; mobile/density/palette gaps
Next return	Focused workout workspace and set semantics

FINAL_RESULT: PASS

Evidence screenshots

Every screenshot has an evidence ID, environment, surface, journey, viewport, theme, locale, URL and observed behavior. No orphan screenshots are included.

Por qué se recomienda este plan

La nutrición propuesta usa tu objetivo, tu ritmo de entrenamiento y tu constancia reciente para evitar un plan teórico difícil de sostener.

El plan se orienta al objetivo pérdida de peso.

La estructura prioriza continuidad y fricción baja porque tu registro reciente todavía es irregular.

Se respeta la ventana de ayuno intermitente y se reajustan excesos dentro de la semana.

AJUSTE SUGERIDO

Prioriza sencillez, saciedad y continuidad diaria.

The screenshot displays the 'Exercise Library' section of the Anclora Impulso application. The interface is clean and modern, with a light orange and white color scheme. On the left, a vertical sidebar contains navigation links: 'Dashboard', 'Nutrition', 'Generate Workout', 'Exercises' (highlighted in orange), 'Progress', and 'Gamification'. The main content area starts with a welcome message to 'Antonio Ballesteros Alonso' and a sub-header 'Exercise Library'. Below this, a filter section allows users to search, filter by category, equipment, difficulty, and environment. The exercises are displayed in a grid, with the first three visible showing a person performing a plank exercise in different variations. The bottom of the image shows the production metadata: 'E21 · PRODUCTION · EXERCISE_LIBRARY · J13 · 1440x900 · light/en' and the URL 'https://impulso.anclora.com/exercises'.
